

GRRRT - SYSTEMS & AI SOFTWARE ENGINEER

github.com/Grorrt | AI Tooling, Systems, & Full-Stack Architecture

PROFESSIONAL SUMMARY

Systems and full-stack software engineer specializing in AI agent orchestration, Model Context Protocol (MCP), automated QA systems, and static security tooling.

KEY PROJECTS

LeadForge MCP - AI Lead Qualification Engine

Implemented 10 Model Context Protocol tools, 4-factor scoring matrix & CRM sync.

VerityQA (qa-ai-assistant) - AI-Powered Quality Assurance Platform

FastAPI and React engine converting requirement specs to deterministic tests.

Malware Analysis Toolkit - Python Security Suite

PE disassembly, entropy calculations, YARA rule matching and forensic logging.

Atlas Core - Scalable Full-Stack Architecture

Modular API gateway, automated database migrations, and load-tested async flows.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS, Bash

Frameworks & Tools: FastAPI, React, Node.js, MCP SDK, Vite, Tailwind CSS, PyTest

Architectures: Local-first, REST APIs, Microservices, Event-driven, Reverse Engineering
